

To whom it may concern: The Christian radio station Air 1 is the best radio station out there for uplifting, postive and worthwhile music. In my opinion, it is the best station on the radio. It is an integral part of the community by supporting the local youth in a postive musical sense, while giving adults something to listen to that integrate both faith and love for music. If this station was taken off the air, I know for a fact that the community would be affected in a negative manner. I believe that this station lifts up the listeners daily, and does not focus on superficial and unimportant things like other secular radio stations. Air 1 includes talk about lifting up marriage, how to help the homeless, how to get involved in the local communities, etc. This promotes postive community involvement and support. This service is in the public interest because it assists in developing morally committed, faith based, God centered people who want to share love, which promotes a postive and giving community. It is to the community's benefit and all the listeners of Air 1 that it stays on the radio despite the upgrade of new technology. Truthfully, I would listen to none of it (LPFM). The community is dying for substance, not fluff. Give us what we yern for. Air 1 does that.
